

Hey, i'm **Juš Lesjak!**

Programmer / Student

Innovation and progress - my two reasons to jump out of the bed in the morning! Combine that with days full of elan, unforgettably crazy ideas put in practice and a strive for perfection in everything I create and you are looking at the **foundational pillars of everything I do-** from writing code and making business ideas happen, to windsurfing.

PROFILE

BORN

26 Sep 2001 - Kranj, SLOVENIA

EMAIL

lesjak.jus@gmail.com

FULL NAME

Juš Lesjak

EDUCATION

DEUTSCHE SPRACHDIPLOM

 Gimnazija Kranj - Completion January 2020

Speaking a second foreign language fluently allows me to pristinely interact with german-speaking people and the culture they represent. The Deutsche Sprachdiplom opens the door to all colleges with classes in german language.

INTERNATIONAL BACCALAUREATE

Gimnazija Kranj (2 Years Programme) - Graduation May 2020

Attending the IB programme at one of the oldest and most renowned gymnasiums in Slovenia gave me a strong foundation on which broad-looking ideas can grow swiftly and precisely. Besides acquiring a disciplined work ethic and boosting my ability to focus, I adopted the IB learner profile traits, such being open-minded and knowledgeable on one hand, and balanced and reflective on the other.

WORK EXPERIENCE

3FS

Intern - Jun 2018 - Sep 2018

The internship project I was assigned to conquer was to create a timetable web application to run on a Raspberry Pi that tracks a specific conference room's availability and schedule of the current day by accessing the Google Calendars API. Having a exceptional mentor, the CTO, who encouraged me to be autonomous by figuring out the things I didn't understand on my own, as well as being a team player and a morning-coffee-communicator made me adopt his such non code-related skills as well. Through the stimulating 3FS working enviroment and excellent guidance by my mentor I picked up languages like Golang, HTML, JavaScript, coding prerequisites such as using Git and terminal, and development & deployment practices, for instance writing unit tests as a part of Continuous Integration, and using SSH and Docker.

EUROCOM D.O.O.

Storage worker - Jun 2016 - Sep 2016

Working as a storage worker at Slovenia's biggest office-material and School Supplies company that imports shipment containers and exports products daily to all major stores in Slovenia gave me a exclusive and first-hand insight into the warehouse-logistics part of running a successful business.

STUDENTS ORGANISATION KRANJ

President of High school council - May 2017 - present

Leading a team of 4 highschool students full of creative ideas, I got a chance to sharpen my communication, motivation and feedback skills. Having organised projects such as concerts, highschool trips and workshops, some of which were successful and others I learned from, I got to put my ideas to practice and organize events in their fullness- from project planning and strong, unconventional promotion to event execution and project reports.

TEDXYOUTH@GIMNAZIJA KRANJ

Organizer - Dec 2016 - present

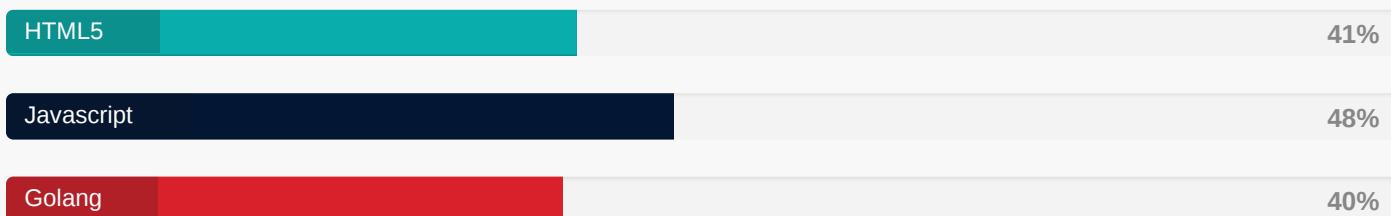

"Ideas are the beginning points of all fortunes", as said by Napoleon Hill, is a statement I strongly agree with. That is exactly why I am part of the TEDx team that organizes conference at my high school, Gimnazija Kranj. Meeting successful speakers and helping them reherser to deliver their ideas in unique, thought-provoking ways that inspire the audience to develop ideas of their own gives me the ability to change my development enviroment, that is, my local community, for the better.

SKILLS

BUSINESS SKILLS

CODE SKILLS

LANGUAGE SKILLS

PROFESSIONAL SKILLS

INTERESTS

ARCHITECTURE

Aesthetics as my favourite area of classical philosophy pulls me towards admiring uniquely designed and expertly brought-into-reality buildings and interiors- from a 21 story glass skyscraper to a hipster local café with artworks on a brick wall and designer wooden handmade chairs.

FINANCE

I see finance as a medium through which I intend to **give back** to both my local Slovenian community and global environment. You can't change the world with good intentions only- you need proper action, and such action is possible only by mastering the mechanism on which our current global society operates: **money**.

WINDSURFING

Thrill, adrenaline and salty water in your eyes! Combine that with the idea of harnessing an elemental force of nature and you get an indescribable experience of **man-nature symbiosis**.
